*Dependent upon mold, material and conditions.
†Average value based on S.P.I. test procedures.
‡Higher torque motor available with lower R.P.M., and recovery rate.
Since continuous improvement is Van Dorn's policy, we reserve the right to change specifications, designs and performance data without prior notice or obligation.
150-RS-8/12F

Van Dorn's fluid drive, or F-Series, toggle clamp machines feature hydraulically driven screws that generate high-quality homogeneous melts at high rates. Stable screw speeds and precise, infinitely variable back pressure control are features contributing to outstanding molding output.

Add faster set-ups, improved molding speeds and minimal maintenance and you have the injection molding capability molders identify with the name, Van Dorn.

STANDARD FEATURES

- Large part removal clearance
- Purge guard with interlock
- Pivoting injection unit
- Integral-base drip pan
- Full-floating hardened toggle pins
- Automatic oil lubrication.

VAN DORN®
Committed to the future of plastics
